RLC Data Pathfinder, *part of the RAF Reservist Data Insights Programme*

The Reserve focused programme is designed by award-winning provider **Multiverse**, and on completion provides participants with an international recognised qualification, Data Technician L3.

The content of the programme is delivered over **13 months**, and gives access to **1:1 monthly coaching** sessions with your own individual expert coach, **group coaching sessions,** and **membership** to the Multiverse networking & welfare community.

The programme focuses on developing a common data language across Defence, working confidently with metrics using Excel and PowerBi, finding and presenting insight, developing data narratives, and sourcing data to improve data-driven decision making.

Those reservists who apply must have the opportunity to work with data in their civilian role, and have a civilian employer who is supportive of individuals spending **10%** *of their time receiving training plus* **10%** *of their time applying their learning (~****7 hours per week total****).*

This is an **exclusive** opportunity to join a **industry leading programme** which Multiverse are already delivering to NHS and over 300 organisations such as the *Metropolitan Police, the Ministry of Defence and Ministry of Justice, among other clients they work with such as Facebook, Google, and Deliveroo.*

Please register your interest here.

The opportunity for reservists to lead in modern, relevant training and support the military data revolution

Programme overview

£12, 000 **fully-funded** programme

1. **Getting Started with Data and Developing a Common Approach**
